

No. of Functional Features Included in the Solution

Date	July 7, 2026
Team ID	XXXXXX
Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

Functional Features Detail

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Zero-Shot Theme Extraction	Leverages DistilBERT to classify input text descriptions and automatically isolate contextual network event themes without prior training labels.	Backend / ML Engine	Done	1.0
2	Icebreaker Generation Engine	Uses the GPT-2 transformer framework to dynamically engineer personalized conversation starters matched to user interests and extracted contexts.	Backend / ML Engine	Done	1.0
3	Real-Time Context Validation	Integrates a live Wikipedia API wrapper layer to pull concurrent trending background context and perform structural data validation metrics.	API Integration	Done	1.0
4	Local Performance Feedback	Allows users to capture interactive context helpfulness ratings (thumbs up/down) stored atomically inside local JSON telemetry structures.	Storage / Telemetry	Done	1.0
5	Multi-Tab Interactive Dashboard	An elegantly modular presentation frontend deployed with Streamlit components, organizing user forms, output cards, and telemetry breakdowns.	Frontend UI	Done	1.0

Feature Summary:

Metric	Count / Value
Total Features Planned	5
Total Features Implemented	5
Core / Must-Have Features	4
Additional / Nice-to-Have Features	1
Features Tested & Verified	5

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	1	Streamlit Multi-Tab presentation form dashboard controls.
2	Backend / Logic	2	DistilBERT Theme Processing and GPT-2 Icebreaker Pipeline.
3	Database / Storage	1	Atomic multi-process Local JSON logging file system wrapper.
4	API / Integration	1	Live Wikipedia REST API asynchronous client context pipelines.
5	Security / Authentication	0	N/A (Local standalone evaluation deployment infrastructure).
