

Demonstration of Proposed Features

Date	15 March 2026
Team ID	XXXXXX
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	AI-Based Event Theme Extraction	Used DistilBERT zero-shot classification to identify the main theme of networking events from user input.	Implemented	Yes	Successfully demonstrated with multiple event descriptions.
2	Personalized Conversation Starter Generation	GPT-2 generates customized conversation starters based on event topics and user interests.	Implemented	Yes	Produced natural and context-aware networking suggestions
3	Real-Time Fact Verification	Integrated Wikipedia API to validate facts and provide reliable information before networking conversations.	Implemented	Yes	Live API responses were demonstrated successfully.
4	User-Friendly Web Interface	Streamlit frontend allows users to enter event details, receive AI suggestions, and interact with the system easily.	Implemented	Yes	Smooth navigation and responsive interface demonstrated.
5	Feedback Collection System	Stores user feedback (Thumbs Up / Thumbs Down) locally using JSON files for future performance analysis	Implemented	Yes	Feedback data successfully recorded and displayed.
6	FastAPI Backend Integration	FastAPI handles API requests, model execution, and communication between frontend and AI modules.	Implemented	Yes	Backend services performed efficiently during the demonstration.

Feature Implementation Summary:

Total Features Proposed	Result
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
