

Data Flow Diagram

Date	07 July 2026
Team ID	
Project Name	Personalized Networking Assistant
Maximum Marks	2 Marks

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or external system that sends or receives data (e.g., User / Event Attendee, Wikipedia Public API Server).
Rectangle with numbered header	Process 1: Analyze Event	An activity that accepts the raw event text blurb and uses the DistilBERT pipeline to compute and extract core thematic percentages.
Rectangle with numbered header	Process 2: Generate Conversation Starters	An activity that processes selected themes and user interests through the GPT-2 pipeline to craft customized icebreaker recommendations.
Rectangle with numbered header	Process 3: Fact Check	An activity that takes a specific technical term or phrase from the user, queries the external wrapper, and formats a topical data card summary.
Rectangle (solid fill, no number)	Data Store	Places where interaction records are held for later use (e.g., history.json for query logs, feedback.json for tracking thumbs up/down success metrics).
Labeled arrow	Data Flow	The movement of information between entities, processes, and data stores (e.g., Event description text, Suggested icebreakers, Interaction metric logs).
